About Me

I am a Software Developer with hands-on experience in building scalable web and mobile applications using ReactJS, NextJS, Flutter, and Firebase. I have professional experience working on real-world client projects, including frontend-backend integration, chatbot deployment, payment gateway integration, and location-based services. I was promoted from Software Intern to Software Trainee at CodeWork.ai, where I contribute to product development, requirement elicitation, and cross-functional collaboration. I am passionate about clean code, system design fundamentals, and continuously learning new technologies to solve impactful problems.

Technical Skills

Frontend: ReactJS, NextJS, VueJS, Flutter, TailwindCSS, HTML5, CSS3, JavaScript (ES6+)

Backend: NodeJS, ExpressJS, Firebase, REST APIs

Databases: MongoDB, SQL

Animation & UI: AnimeJS

Programming: JavaScript, Python

Data Libraries: Pandas, Matplotlib

Tools: Git, GitHub, VS Code, Cursor AI

Concepts: Responsive Design, Authentication, State Management, CRUD Operations

Experience

CodeWork.ai

Chennai, India

Software Intern

June 16, 2025 – July 11, 2025

- Worked on frontend development using ReactJS, NextJS, and VueJS for client-facing websites.
- Built and optimized UI components for multiple client projects with a focus on responsiveness and performance.
- Integrated frontend interfaces with backend services using REST APIs and MongoDB.
- Implemented and embedded chatbot solutions into client websites.
- Performed Whitebox and Blackbox testing to identify bugs, security issues, and logic flaws.

Software Trainee (Promoted)

July 12, 2025 – Present

- Developing a taxi booking mobile application with complex business logic.
- Built the frontend using Flutter and implemented backend services using Firebase.
- Integrated Google Maps API for live location tracking and route visualization.
- Implemented Cashfree payment gateway for secure online transactions.
- Integrated Twilio VoIP services for in-app calling and communication.
- Actively participated in client calls, requirement elicitation, and requirement negotiation with project managers and stakeholders.
- Implemented authentication, user role management, and secure data handling.

Education

B.Tech in Information Technology

2023 – 2027

KCG College of Technology

Chennai

CGPA: 9.2

Higher Secondary (Class XI - XII)

2021 – 2023

Sri Chaitanya Techno School,

Perumbakkam

12th Mark: 431 / 500

Projects

InspectPro – Site Inspection & Report Automation App (*In Progress*)

- Designed and developed a **professional mobile application for construction site inspections and documentation**.
- Enables site engineers to **capture photos with GPS location, timestamps, and contextual labels** to ensure traceable work evidence.
- Implemented **task-based inspection workflows** to prevent missing or incomplete site documentation.
- Built **grid-based photo layouts (2×2, 3×3)** for consistent and professional inspection reports.
- Automated generation of **structured PDF reports** containing project details, inspection metadata, and visual proof.
- Integrated **secure authentication** with role-based access for Engineers, Supervisors, and Admins.
- Implemented **cloud storage and report history management** for easy access, sharing, and audits.
- Focused on **clean, site-friendly UI** optimized for outdoor and field usage.

Tech Stack: Flutter, Firebase Authentication, Cloud Storage, Riverpod, GoRouter

LINK – Taxi Booking & Ride Management App (*Intership*)

- Designed and developed a **mobile taxi booking application** connecting passengers with nearby drivers through a simple and efficient booking flow.
- Implemented **real-time ride request and driver assignment logic** to reduce booking delays and improve ride availability.
- Enabled users to **book, track, and manage rides** with live ride status updates.
- Built **driver-side workflows** for accepting, rejecting, and completing ride requests.
- Integrated **location-based services** to calculate pickup and drop-off points accurately.
- Implemented **secure user and driver authentication** with session management.
- Designed **ride history and trip records** for both users and drivers.
- Focused on a **clean, user-friendly UI** optimized for quick actions and minimal user effort.

Tech Stack: Flutter, Firebase Authentication, Firestore, Google Maps API, Twillio, CashFree.

Stafia-CRM – WhatsApp Lead Automation System (*In Progress*)

- Designed and built a **WhatsApp-first lead automation system** for small businesses to manage customer inquiries efficiently.
- Centralized **WhatsApp lead capture** into a single dashboard to avoid missed or untracked conversations.
- Implemented **click-to-chat WhatsApp workflows** for instant customer engagement.
- Build **smart follow-up reminders** to ensure timely responses and improve lead conversion rates.
- Designed **lead pipelines and stages** to track enquiry progress directly from WhatsApp conversations.
- Added **custom fields based on business type** to organize WhatsApp leads contextually.
- Enabled **activity timelines** to track message history and follow-ups per lead.
- Focused on **simple UI and quick onboarding** for non-technical business owners and staff.

Tech Stack: React, Next.js, Supabase, WhatsApp Business API

Doc's Code – Smart Patient Management System

- Developed a **web-based application** for creating and printing professional medical prescriptions.
- Enables doctors to generate **structured prescriptions** with patient details, diagnosis, medicines, and dosage.
- Implemented **standardized, print-optimized templates** for accurate and reliable A4/clinic printing.
- Integrated **secure access, prescription history, and clinic branding** for consistent and safe usage.
- Designed a **clean, clinic-friendly UI** optimized for fast, high-volume workflows.

Tech Stack: React, Tailwind CSS, Firebase, Node.js

MoodMoji – AI-Powered Mood Tracker

- Built a lightweight web application to **test and experiment with JavaScript concepts** using an emoji-based mood tracker.
- Implemented **emoji-based mood input** with basic analytics across day, week, and month views.
- Used the project as a sandbox to validate **UI interactions, state handling, and data flow** in JavaScript.

Tech Stack: HTML, CSS, JavaScript

Certifications

- GUVI IIT – Python Certification (2024)
- TechnoSoft – Python Scripting (2020)
- SheKnowsAI – Generative AI (2024)

Achievements & Activities

- Participated in multiple hackathons (2023–2024).
- Built and deployed multiple personal and academic projects.
- Strong academic performance with consistent top CGPA.
